LeSaint announces major enhancements to their Transportation Management System.

ROMEDEVILLE, Illinois – LeSaint Logistics, a top 3PL provider based outside of Chicago, announces major enhancements to TransTech™, their transportation management system. The new features and benefits include transportation network design for optimizing transportation routes, shipping execution and compliance, carrier relationship management including event management providing comprehensive track and trace. With these additions, LeSaint stays true to providing best in breed technology solutions for their customers.

“It’s always been our goal to provide our customers with the best technology solutions available. TransTech™ has always been part of our suite of technology solutions, but its capabilities have now reached a new level,” comments Jeff Pennington, LeSaint’s President, “We reached out to customers, worked with them and we took a strong look at how their needs were changing. The result is the TransTech™ enhancements that we’re proud to bring out today. It’s just another example of how LeSaint continues to deliver for our customers.”

“The enhancements to TransTech™ have truly been a great support tool for our broad base of transportation management solutions, specifically with LTL and small package solutions,” states Dino Moler, Executive Vice President Client Services for LeSaint Logistics. “LeSaint continues to invest in the technologies that help our customers manage their business. For example, this latest technology continues to be web-enabled and allows for controlled transportation spending with timely, accurate and complete visibility to shipping activities. With the enhanced reporting capabilities, our customers are supported with the comprehensive information they need for making definitive decisions regarding their business.”

LeSaint also offers additional technologies to their customers with the WareTech™ Inventory Management system that provides 24/7, real time reporting via the web, keeping the customer engaged with their inventory status and levels at all times and supported by customized reporting and email alerts.

As a Top 100 3PL provider, LeSaint delivers intelligent warehousing, fulfillment and transportation solutions that provide continuous process improvements to boost the customer’s

bottom line. With 14 facilities nationwide, LeSaint puts a major focus on retail end-to-end solutions. Additionally, they offer turnkey solutions throughout the specialty chemical sector.
